

**AccessPro AP-4**  
 Wireless Access Control Receiver

Installation Instructions

**WARNING**  
 NEVER MOUNT THE UNIT DIRECTLY TO A MOVING DOOR OR GATE!

**Important Mounting Requirements**

The AE-100 Transpire Entry System can be installed for public or private use. The mounting requirements will vary depending on the installation. Review the following information before beginning the installation.

**Mounting Environment**  
 Consider the environmental factors at the desired mounting location. The AE-100 is designed for direct outdoor installations, however, it is preferable to protect the unit from extreme exposure to sun, driving rain, or snow whenever possible. Mounting the unit in a nook can provide extra environmental protection.

**Follow Building Codes**  
 Check all local building codes and ordinances prior to installing the system. Proper installation of the AE-100 conforming to the local building codes for access control equipment is a regulatory requirement. The AE-100 installation is an extremely important and integral part of the overall access control system.

**Mounting Location**  
 If the AE-100 is used to control a door or pedestrian gate, locate the unit as near as practical to the entry point. If the unit is mounted on or in a wall adjacent to the entry point, be sure the wall is sturdy. The repeated shock and vibration from a slamming access door or spring-mounted pedestrian gate must be isolated from the AE-100. NEVER MOUNT THE UNIT DIRECTLY TO A MOVING DOOR OR GATE!

**Gate Installations**  
 If the AE-100 is used to control a gate operator connected to a vehicular gate, the unit MUST be mounted AT LEAST 10 feet away from the gate (open and closed) and gate operator. AT NO TIME SHOULD A PERSON BE ABLE TO TOUCH THE GATE OR GATE OPERATOR AND THE AE-100 AT THE SAME TIME.

**Vehicle Traffic**  
 Do not mount the AE-100 where it extends into any traffic lane. Locate the gooseneck, pedestal or entry kiosk so all parts of the AE-100 are outside the traffic lane. Locate the AE-100 clear of any turn-around lanes vehicle use when access is denied.

**Americans with Disability Act (A.D.A.) Requirements**  
 THE FOLLOWING WHEELCHAIR ACCESS REQUIREMENTS ARE FOR PUBLIC DOOR CONTROL INSTALLATIONS ONLY.

- If the clear floor space allows only forward approach to the system, the maximum high forward reach allowed is 48" above grade to the top of the keypad.
- If the high forward reach to the system is over an obstruction greater than 20" but less than 25", the maximum high forward reach allowed is 48" above grade to the top of the keypad.
- If the clear floor space allows parallel approach by a person in a wheelchair, the maximum high side reach shall be 54" above grade to the top of the keypad.
- If the high side reach is over an obstruction of 24" or less, the maximum high side reach allowed is 48" above grade to the top of the keypad.

equipment with the same model numbers. Contact us for older Linear manuals and for manuals for other gate equipment models. Need assistance or can't find your Linear gate manuals? Please contact our service department at 206-767-9080. Experienced service technicians are here to answer your questions and provide onsite service; emergency service available 24/7 if your gate will not open.
